

AUTOID® 6L-W

High efficiency Heavy usage in-field WinCE handheld terminal

AUTOID® 6L-W is an industrial use data collection terminal, with workload capacity of over 3000 scanning processes per day. Weights at 313g only, comes strong portability, comfortable grip, sturdy and durable, fully satisfy high intensity in-field usage. Applicable in manufacturing; express delivery; warehouse management field and etc.

WinCE 6.0 Operating system, More stable performance

- Carrying Ti 1GHz processor, 512MB (RAM) /512MB (ROM), system runs smoothly and stable
- Built-in 4GB non removable storage, solve the problem of external TF Card Management difficulties
- With optimized Windows CE 6.0 operating system, along with comprehensive data information security protection system, our product can ensure safety of user's information even under reboot, Crash or any other unexpected situations

High performance Wi-Fi, Faster transmission

- With new dual-frequency four-mode Wi-Fi technology, AUTOID® 6L-W is able to bring seamless roaming capability and high signal sensitivity, fully satisfy your Wi-Fi needs

Professional engineering design, Easy to use and carry

- Large key and gap design, optimized for heavy key pressing usage environments
- 3.5 inch screen to display more information
- Flexible charging methods, supporting both USB and Tail plug charging
- Integrated with unique IPM dynamic power management technology, results in lower power consumption, terminal can last 8 to 10 hours with heavy usage

Industrial level quality design, rugged and dependable

- IP65, 1.5m Drop on concrete
- Passed monthly level continuing high load test, fully satisfies in-field long hour heavy usage under extreme environment and maintain stability of the terminal

Application

Express delivery and package sorting

Warehouse management

Production tracing

Featured accessories, expand terminal use application and field

- Removable pistol grip, make your scanning work easier

Removable pistol grip

- Cradle communication design to provide solution for network communication in military and other fields that require high level of security

Single charging cradle (USB, Ethernet port)

5-slot charging cradle (USB)

Other accessories

single battery charging cradle

4-slot battery charging cradle

stylus

durable hand strap

shoulder bag
